

# SANTEKS

## STRONG ACID CLEANING AGENT FOR REMOVING LIMESCALE AND RUST

1L, 5L, 25L

### AREA OF USE

- Sanitary premises, catering kitchens and hospitals
- For cleaning of circular and circulation systems
- In diluted form for cleaning of stainless steel surfaces

### PROPERTIES

- Efficient cleaning concentrate
- Efficiently removes even ingrained grime, rust, limescale and mould
- Low foam formation

### INSTRUCTIONS OF USE

- Apply agent onto surface and leave to act for a couple of minutes. Wipe the surface with a brush or sponge and rinse with water.

### DOSAGE

- Dilute with water 1:10- 1:100 (depending on the amount of the dirt)

### COLOUR AND STATE

- Yellowish liquid completely soluble in water, with a slight smell.

### INGREDIENTS

- Sulphamic acid
- Phosphoric acid
- <3% non-ionic surfactants

pH 1,5

Caustic

### CAUTION

- Use protective gloves. Not to be used together with agents containing chlorine
